Experience

Term Projects

Voice Control Wheelchair (Final Year Project):
Platform Used: Arduino, C# WPF
Description: We are programming **Arduino** to recognize voice signals given by user through microphone and operate the motors accordingly.

Clinica:
Platform Used: Java, Oracle Database
Description: A clinical management system to hold previous records of the patients who had visited. Their prescriptions and tests are stored in a database with respect to dates.

Online Mobile Store:
Platform Used: C# asp.net, MVC Razor 5, HTML, CSS
Description: People can check the specifications of different mobile phones from different brands and can order them online through this website.

Library management System:
Platform Used: C++, Records Managed in files
Description: An integrated library system for a library, used to track items owned, orders made, bills paid, and patrons who have borrowed and their returning time.

Scholarship Module for CMS:
Platform Used: PHP, HTML, CSS, JAVASCRIPT
Description: A module to integrate with our university CMS where students can see the list of available scholarships and can apply for them.

Other Projects

Muse Grape:
Platform Used: C# asp.net, MVC Razor 5, HTML, CSS
Description: Muse Grape is a source for downloading free adobe muse widgets.

Hover World Productions:
Platform Used: PHP, HTML, CSS, JAVASCRIPT, SQL Database
Description: A website for an agency that provides drones footages and pictures.

Senior Korner:
Platform Used: WordPress, Woo Commerce
Description: Medical Supplies Retail Store that carries, supplies, and delivers all lines of supplies, from ambulatory supplies like canes, walkers to mobility aids via wheelchairs and scooters, lift chairs, pull-ups, knee and back braces, raised toilet seats and lots more.

African Caribbean Music Festival:
Platform Used: WordPress, Woo Commerce, Event Brite, Tickets Calendar
Description: A website for selling millennials and tickets for the **African Caribbean Music Festival**

Contacts App:
Platform Used: Java/Android
Description: A simple Android App on which a user can store his/her contacts. It will store all the contacts in a database and show in a recycler view list.
